DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 42 (in part), 44 (in part), 46 (in part), drawn to a composition of matter comprising an isolated polypeptide, an antagonist of it or a peptide mimetic, or a pharmaceutical composition comprising any of the polypeptide or the peptide mimetic, a kit for measuring the activity or presence of them and a process of producing the isolated polypeptide.

Group II, claims 42 (in part), 44 (in part), drawn to a composition of matter comprising a ligand that binds to a polypeptide, or a pharmaceutical composition comprising it or a kit for measuring the activity or presence of it.

Group III, claims 42 (in part), 43, 46 (in part), drawn to a composition of matter comprising an isolated nucleic acid, a vector comprising it and a cell transformed with the vector or a pharmaceutical composition comprising it or a kit for measuring the activity or presence of it.

Group IV, claims 42 (in part), drawn to a composition of matter comprising a primer of disclosed sequence.

Application/Control Number: 10/530,104

Art Unit: 1647

Group V, claims 42 (in part) and 45, drawn to a composition of matter comprising an

Page 3

expression modulator of a polypeptide.

Group VI, claims 42 (in part), drawn to a composition of matter comprising a transgenic

animal cell or to a transgenic animal.

Group VII, claims 47-57, drawn to methods of use of the composition of matter of any of

the groups I-VI.

2. The inventions listed as Groups I-VII do not relate to a single general inventive

concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

corresponding special technical features for the following reasons: they do not present a

common structure linked to a common function. The inventions of the groups I-V have

or relate to different compounds with different structures and functions. A

comprehensive search for all the structures would have been an undue burden on the

Examiner. The inventions of groups I-V and the invention of group VI differ in

methodology, goal and function. The inventions of Groups I-VI can have other uses that

the methods of group VII. Because the search for all the inventions would have been

burdensome for the Examiner, the restriction is proper.

3. This application contains claims directed to more than one species of the generic

invention. These species are deemed to lack unity of invention because they are not so

linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Category A: Seq. Id. Nos.: 2, 4, 6, 8, 10, 12, 14, and 16.

Category B: Seq. Id. Nos: 1, 3, 5, 7, 9, 11, 13, and 15.

Category C: the primer pairs of the following Seq. Id. Nos: 17-18, 19-20, 21-22, 23-24, 25-26, and 27-28.

Page 4

Category D: making a genetically engineered cell; producing a polypeptide; producing a pharmaceutical composition; the treatment of a disease; screening candidate compounds; identifying a candidate compound; or determining the activity, presence or both activity or presence of said composition of matter.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election. For Inventions I-VI, in order for the reply to be fully responsive, the Applicant should choose, corresponding with the elected invention, a specie from the categories A, B or C as applicable, (if necessary from more than one category) for further prosecution of the application. The election should possess internal consistency (i.e., a sequence for amino acids, consistent with a nucleic acid sequence encoding that particular amino acid and the primer pair needed for amplification of the corresponding amino acids). If Invention VI is elected, the Applicant should choose a single ultimate specie from Category D which is going to relate to ONE Invention from Groups I-VI and ONE specie from the categories A, B or C as applicable. Again internal consistency is to be preserved.

Art Unit: 1647

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Category A: Claims 42 (in part), 44 (in part), 46 (in part), 47 (in part), 50-53 (in part), 54.

Category B: Claims 42 (in part), 43, 44 (in part), 45, 46-47(in part), 48, 50-53 (in part),

and 55

Category C: claims 42 (in part), 56, and 57.

Category D: claims 47-57.

The following claims are generic: 42 and 47.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: they do not present a common structure linked to a common function. The species of each category have or relate to different compounds with different structures and functions. A comprehensive search for all the structures would have been an undue burden on the Examiner. Because the search for all the structures or methods would have been burdensome for the Examiner, the election requirement is proper.

Application/Control Number: 10/530,104 Page 6

Art Unit: 1647

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number: 10/530,104 Page 7

Art Unit: 1647

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elly-Gerald Stoica whose telephone number is (571) 272-9941. The examiner can normally be reached on 8:30-17:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary B. Nickol can be reached on (571) 272-0835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
